SCHEMA FOR TABLE

1) Create table for 'pizzas'
```
create table pizzas (
        pizza_id varchar(50) not null,
        pizza_type_id varchar(50) not null,
        size varchar(50) not null,
        price numeric not null
        );
```

2) Create table for 'pizza_types'
```
create table pizza_types (
        pizza_type_id text not null,
        name text not null,
        category text not null,
        ingredients text not null
        );
```

3) Create table for 'orders'
```
create table orders (
   order_id SERIAL primary key not null,
   order_date DATE not null,
   order_time TIME not null
   );
```

4) Create table for 'order_details'
```
create table order_details (
        order_details_id int primary key not null,
        order_id int not null,
        pizza_id text not null,
        quantity int not null
        );
```

```
COPY pizzas( pizza_id,pizza_type_id, size, price)
from 'D:\pavan\SQL Project\PizzaHut\pizzas.csv'
delimiter ',' csv header;
```
